

Can You Bridge It?

Grades 1 -5

Introduction

We'll be minding the gap in this Discovery@Home! Challenge yourself to construct a bridge out of materials you find around your home. Test how much weight your bridge can hold before you have to rebuild.

Materials

- Find materials that you can use to form a bridge, such as cardboard, newspaper, Lego, rope, string, or elastics
- Scissors
- Tape
- Something to be used as a weight in order to test how much your bridge can hold, such as blocks, rocks, or books
