

Wiggling Worms

Grades P - 3

Introduction

Our next Discovery@Home will give your young scientist a chance to meet our special red wiggler worms. Learn all about how they move, what they eat, and where they live, and say hello to some baby worms under our microscope. Try moving like a red wiggler and making your own squishy paper worm with Discovery Centre's Science Educators.

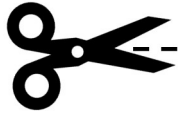

Materials

- Printed worm template (page 2) or paper to draw your own
- Scissors
- Colouring supplies (crayons, markers, or coloured pencils)

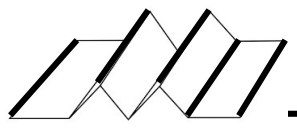

Brought to you by:

Cut along dashed line

Fold on solid lines
