

### Driving Question

How can we investigate the most effective strategies against the climate impacts being faced by our communities?

### Challenge 1: Community Profile

What key information about this community do you think will help you predict the biggest impact of climate change? How might the people in this community be impacted by climate change? How might the environment in this community be impacted by climate change?

Community name: \_\_\_\_\_

Record any relevant details here:

**Compare details:** How do you think this community will change because of climate change by 2050? What impact will affect this community the most?

(Write, draw, or discuss your prediction)

Use the organizer on Page 2 to consider how the 4 Rs of Netukulimk relate to the impacts of climate change this community is facing and to help you justify which impact of climate change is affecting this community the most.

# Observation Research Card

## Climate Quest

### Respect

How are the rhythms, cycles, and patterns of this community respected? How are they impacted by climate change?
